Lead with Generics

Prescription Step Therapy Program

Here's How It Works

The next time your doctor writes you a prescription in one of the drug classes identified for our program:

- 👉 Ask if a generic option (Step 1) drug is right for you.
- 👉 If you've already tried a generic option, or if your doctor decides one of these generics is not right for you, your physician may call 1.800.842.2015 to request an authorization for a brand-name (Step 2) drug.
- 👉 If your physician's request for a brand-name drug does not meet the necessary criteria to start a brand-name drug (without you first trying a Step 1 drug), or if you simply choose a brand-name drug from our *Lead with Generics* program without first trying a generic option, the brand-name drug will not be covered under your benefits.

If You Are Already Using a Brand-Name (Step 2) Drug

If you are already taking a brand-name drug identified in our *Lead with Generics* program when the program is first implemented on your benefit plan, you are not required to change to a generic option. However, you are required to try a generic option for any new drug prescribed after the start of the program, if your treatment calls for Step 2 drugs included in our *Lead with Generics* program.
