

All covered prescription medications are available at a participating pharmacy for the day supply limitation stated in your member contract/certificate (typically up to a 30-day supply at retail and up to a 90-day supply for mail order). In addition, quantity per dispensing (QPD) limits/allowances are placed on certain medications and are based on the manufacturer's recommended dosage and duration of therapy, common usage for episodic or intermittent treatment, FDA-approved recommendations and/or clinical studies, and/or as determined by Blue Cross and Blue Shield of Louisiana.

The following is a list of the most commonly prescribed medications subject to QPD limits/allowances. Drugs listed in this section are not meant to be a complete list of medications covered by your plan. As benefits may vary by group and individual plans, the inclusion of a medication on this list does not imply prescription drug coverage.
