

Blue Selections Preferred Rx Member Guide

2009

Please bring this guide with you to your next doctor's visit.

Dear Member:

Blue Cross and Blue Shield of Louisiana and our subsidiary, HMO Louisiana, Inc., (collectively referred to herein as BCBSLA), work in partnership with Express Scripts, Inc.,* an independent pharmacy benefit management company, to administer your prescription drug program. We have put together the *Blue Selections Rx Member Guide*, which we hope will help you understand your pharmacy benefits. Understanding your benefits is key to getting the most from your health plan, since pharmacy benefits may be subject to various copayments, prior authorization requirements, quantity-per-dispensing limitations and specialty pharmacy program restrictions.

BCBSLA maintains a Pharmacy & Therapeutics Committee, a group of local physicians and pharmacists that reviews individual drugs and classes of medications based on safety, efficacy and cost information. The role of this committee is to ensure that, where possible, adequate coverage of medications exists.

The *Blue Selections Rx Member Guide* contains 800 of the most commonly prescribed medications for BCBSLA members. This guide can be found on the website at www.bcbsla.com/pharmacy by clicking on “2009 Five-Tier Drug Guide.” You can also request a copy of this document by calling the Express Scripts Customer Service Department toll-free at 1.866.781.7533, which is also listed on your ID card.

Drugs listed in this guide are not meant to be a complete list of medications covered by your plan. All lists are subject to change and may not apply to all group and individual benefit plans. Some benefit plans may include or exclude coverage for specific medications. Please refer to your member contract/certificate for pharmacy coverage exclusions and limitations. The *Member Guide* applies only to prescription medications dispensed on an outpatient basis by participating pharmacies.

Your plan offers a five-tier copayment structure for covered medications. You will pay the lowest copayment when you use generic drugs (Tier 1) and the highest copayment for multi-source brand (Tier 4) and injectable medications (Tier 5). Tier classifications are described as follows:

Tier 1 – a prescription drug that is primarily a generic drug, although some brand-name drugs may fall into this category.

Tier 2 – a prescription drug that is primarily a brand-name drug, although some generic drugs may fall into this category.

Tier 3 – a prescription drug that is a brand-name drug that may have a therapeutic alternative as a Tier 1 or Tier 2 drug. Covered compounded drugs are included in this tier.

Tier 4 – a brand-name drug for which a generic equivalent is available (i.e., multi-source brand drug).

Tier 5 (Injectable Drugs) – those medications that are intended to be self-administered. Insulin and injectable antihemophilic prescription drugs may be included in another drug tier.

Please note that any brand-name drug that loses patent protection after the printing of this publication and becomes available as a generic equivalent will require a Tier 4 copayment.

The *Member Guide* displays covered prescription drugs in a table (see sample below). The first column provides the drug name; brand-name drugs are listed in upper case, generic drugs in lower case. The “PA/QPD/SP/ST” column highlights those drugs that require prior authorization (PA), quantity-per-dispensing limits (QPD), specialty pharmacy program restrictions (SP), or step therapy (ST). An “X” placed under the specific “Tier” column indicates the specific tier level coverage for a prescription drug. The “Recommended Alternatives” column indicates that a lower copayment alternative drug is available in another tier. In this column, brand-name drugs are listed in upper case and generic drugs in lower case.

Drug Name	PA/QPD/SP/ST	Tier					Recommended Alternatives
		1	2	3	4	5	
generic		X					
BRAND NAME	PA		X				generic
BRAND NAME	QPD			X			PREFERRED BRAND
MULTI-SOURCE BRAND NAME					X		generic
INJECTABLE DRUG						X	

In the index, drugs are listed alphabetically with a chapter and section reference to help you locate the drug within the body of the *Blue Selections Preferred Rx Member Guide*.

PA: Medications requiring Prior Authorization

Certain high-risk or high-cost medications require prior authorization by BCBSLA. Prior authorization criteria have been established by the Pharmacy & Therapeutics Committee after consideration of the current medical literature. Prior authorization requests are processed by Express Scripts. If you need prior authorization for your medication, please have your physician fax or call Express Scripts as follows.

Fax requests to: 1.877.837.5922

Phone requests to: 1.800.842.2015

QPD: Medications subject to Quantity Per Dispensing limitations

Covered prescriptions have a day supply limitation set forth in your member contract/certificate (typically up to a 30-day supply at a retail pharmacy and up to a 90-day supply for mail-order). These limits are based on the manufacturer’s recommended dosage and duration of therapy; common usage for episodic or intermittent treatment; FDA-approved recommendations and/or clinical studies; and/or as determined by BCBSLA. QPD limits/allowances are subject to quantity limits per day supply, per dispensing event or any combination thereof. A complete list of drugs with their QPD limitations can be found at the Blue Cross and Blue Shield of Louisiana website, www.bcbsla.com/pharmacy, by clicking on “Quantity Per Dispensing (QPD) Level Limits/Allowances.” You may also request a hard

copy by calling the Express Scripts Customer Service Department toll-free at 1.866.781.7533, which is also listed on your ID card.

SP: Specialty Pharmacy Program restrictions

Certain high-cost drugs are commonly referred to as “specialty drugs.” To receive in-network benefits/coverage for these medications, these drugs must be dispensed through a select group of contracted specialty pharmacies or your medical provider. A complete list of drugs included in the Specialty Pharmacy Program can be found at the Blue Cross and Blue Shield of Louisiana website, www.bcbsla.com/pharmacy, by clicking on “Specialty Pharmacy Program Drug List.” For information about our contracted specialty pharmacies, please call the BCBSLA Customer Service number on your member ID card.

ST: Medications requiring participation in the *Lead with Generics Step Therapy Program*

In certain drug classes, members are required to first try one prescription drug to treat a medical condition before another prescription drug will be covered for that condition. For example, if Drug A (generic) and Drug B (brand) both treat the member’s medical condition, we may require the member’s physician to prescribe Drug A first. If Drug A does not work for the member, then we will cover a prescription written for Drug B.

Blue Cross and Blue Shield of Louisiana recognizes that you and your physician always make the final decision for your healthcare needs. We encourage you to share this member guide with your physician at your next visit or before filling your next prescription. That way you and your doctor may choose the most appropriate drug for you while helping to minimize your out-of-pocket expense. Please discuss any questions or concerns about your drug therapy with your physician or pharmacist. If your physician prescribes a medication that is not in the *Blue Selections Rx Member Guide*, or should you have any questions, please call Express Scripts at 1.866.781.7533. Additional information and updates can be found on the Blue Cross and Blue Shield of Louisiana website at www.bcbsla.com or on the Express Scripts website at www.express-scripts.com.
