

## Common Drugs Not Covered and Their Covered Alternatives

Your plan covers thousands of brand and generic drugs; however, some drugs are not covered.

### About this list:

- This is a list of the most common single-source brand (drugs that do not have a generic equivalent or exact copy) and generic drugs that are **not covered** by your plan.
- Multi-source brand name drugs (drugs that have a generic equivalent or exact copy) are not included on this list, but most will not be covered.
- You will also find drugs that are covered and treat the same health problems as those that aren't covered on this list.

### Find out if you take a drug that is not covered:

1. Check the label on your prescription medicine for the name of your drug.
2. Then check this list of **Drugs Not Covered and Their Covered Alternatives**.

### If your drug is in the Drugs Not Covered column:

- Talk to your doctor about switching to a covered drug to treat your health problem.
- Your doctor may also ask for a drug to be covered if you have a medically necessary need for it. We will review your doctor's request, but coverage may not be possible for all drugs.
- If you want to take a drug that is not covered, you may have to pay its full cost.

**Learn more:** You can learn more about covered drugs at [bcbsla.com/covereddrugs](http://bcbsla.com/covereddrugs).
