Topical Antifungals

Policy # 00527
Original Effective Date: 01/01/2017
Current Effective Date: 10/10/2022

Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the "Company"), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.

When Services May Be Eligible for Coverage
Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- Benefits are available in the member’s contract/certificate, and
- Medical necessity criteria and guidelines are met.

Based on review of available data, the Company may consider the following topical antifungal products: Mentax®‡ 1% (butenafine) cream, Ecoza™‡ 1% (econazole) foam, Luzu™‡ 1% (luliconazole) cream, branded Luliconazole 1% cream, Oxistat™‡ 1% (oxiconazole) lotion, Oxistat 1% (oxiconazole) cream, oxiconazole 1% cream, Ertaczo™‡ 2% (sertaconazole) cream, Exelderm™‡ 1% (sulconazole) cream, branded Sulconazole 1% cream, Exelderm 1% (sulconazole) solution, branded Sulconazole 1% solution, Naftin™‡ 1% (naftifine) gel, naftifine 1% gel, Naftin 2% (naftifine) gel, Naftin 2% (naftifine) cream, naftifine 1% cream, naftifine 2% cream, Jublia™‡ 10% (efinaconazole) solution, Kerydin™‡ 5% (tavaborole) solution, tavaborole 5% solution, Extina™‡ 2% (ketoconazole) foam, Xolegel™ 2% (ketoconazole) gel, Loprox™‡ 1% (ciclopirox) shampoo, Loprox 0.77% (ciclopirox) cream, and Loprox (ciclopirox) 0.77% suspension to be eligible for coverage** when the below patient selection criteria are met:

Patient Selection Criteria
Coverage eligibility will be considered for Mentax 1% (butenafine) cream, Ecoza 1% (econazole) foam, Luzu 1% (luliconazole) cream, branded Luliconazole 1% cream, Oxistat 1% (oxiconazole) lotion, Oxistat 1% (oxiconazole) cream, Ertaczo 2% (sertaconazole) cream, Exelderm 1% (sulconazole) cream, branded Sulconazole 1% cream, Exelderm 1% (sulconazole) solution, branded Sulconazole 1% solution, Naftin 1% (naftifine) gel, naftifine 1% gel, Naftin 2% (naftifine) gel, Naftin 2% (naftifine) cream, naftifine 1% cream, naftifine 2% cream, Jublia 10% (efinaconazole) solution, Kerydin 5% (tavaborole) solution, tavaborole 5% solution, Extina 2% (ketoconazole) foam, Xolegel 2% (ketoconazole) gel, Loprox 1% (ciclopirox) shampoo, Loprox 0.77% (ciclopirox) cream, and Loprox (ciclopirox) 0.77% suspension to be eligible for coverage** when the below patient selection criteria are met:
Topical Antifungals

Policy # 00527
Original Effective Date: 01/01/2017
Current Effective Date: 10/10/2022

0.77% (ciclopirox) cream, or Loprox (ciclopirox) 0.77% suspension when the following criteria are met for the requested drug:

- For Mentax 1% (butenafine) cream, Ecoza 1% (econazole) foam, Luzu 1% (luliconazole) cream, branded Luliconazole 1% cream, Oxistat 1% (oxiconazole) lotion, Oxistat 1% (oxiconazole) cream, oxiconazole 1% cream, Ertaczo 2% (sertaconazole) cream, Exelderm 1% (sulconazole) cream, branded Sulconazole 1% cream, Exelderm 1% (sulconazole) solution, branded Sulconazole 1% solution, Naftin 1% (naftifine) gel, naftifine 1% gel, Naftin 2% (naftifine) gel, Naftin 2% (naftifine) cream, naftifine 1% cream, or naftifine 2% cream requests:
  - Patient has tried and failed (e.g., intolerance or inadequate response) at least TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) unless there is clinical evidence or patient history that suggests the use of TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) will be ineffective or cause an adverse reaction to the patient.

- For Jublia 10% (efinaczone) solution, Kerydin 5% (tavaborole) solution, or tavaborole 5% solution requests:
  - Patient has tried and failed (e.g., intolerance or inadequate response) a 3 month course of treatment with generic oral terbinafine OR generic oral itraconazole unless there is clinical evidence or patient history that suggests the use of generically available oral terbinafine or generically available oral itraconazole will be ineffective or cause an adverse reaction to the patient; AND
  - Patient has tried and failed (e.g., intolerance or inadequate response) a 48 week course of treatment with generic topical ciclopirox unless there is clinical evidence or patient history that suggests the use of generically available topical ciclopirox will be ineffective or cause an adverse reaction to the patient.

- For Xolegel 2% (ketoconazole) gel, Loprox 1% (ciclopirox) shampoo, or Extina 2% (ketoconazole) foam requests:
  - Patient has tried and failed (e.g., intolerance or inadequate response) at least TWO of the following generic prescription topical antifungal products for seborrheic dermatitis (ketoconazole foam, ciclopirox gel/shampoo) unless there is clinical evidence or patient history that suggests the use of TWO of the following generic prescription topical antifungal products for seborrheic dermatitis (ketoconazole foam,
ciclopirox gel/shampoo) will be ineffective or cause an adverse reaction to the patient.

- For Loprox 0.77% (ciclopirox) cream requests:
  - Patient has tried and failed (e.g., intolerance or inadequate response) at least TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) unless there is clinical evidence or patient history that suggests the use of TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) will be ineffective or cause an adverse reaction to the patient; AND
  - Patient has tried and failed (e.g., intolerance or inadequate response) the generic equivalent ciclopirox 0.77% cream unless there is clinical evidence or patient history that suggests the use of the generic equivalent ciclopirox 0.77% cream will be ineffective or cause an adverse reaction to the patient.

- For Loprox (ciclopirox) 0.77% suspension requests:
  - Patient has tried and failed (e.g., intolerance or inadequate response) at least TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) unless there is clinical evidence or patient history that suggests the use of TWO of the following generic prescription topical antifungal products (ketoconazole, clotrimazole, econazole) will be ineffective or cause an adverse reaction to the patient; AND
  - Patient has tried and failed (e.g., intolerance or inadequate response) the generic equivalent ciclopirox 0.77% suspension unless there is clinical evidence or patient history that suggests the use of the generic equivalent ciclopirox 0.77% suspension will be ineffective or cause an adverse reaction to the patient.

**When Services Are Considered Not Medically Necessary**

Based on review of available data, the Company considers the use of Mentax 1% (butenafine) cream, Ecoza 1% (econazole) foam, Luzu 1% (luliconazole) cream, branded Luliconazole 1% cream, Oxistat 1% (oxiconazole) lotion, Oxistat 1% (oxiconazole) cream, oxiconazole 1% cream, Ertazol 2% (sertaconazole) cream, Exelder 1% (sulconazole) cream, branded Sulconazole 1% cream, Exelder 1% (sulconazole) solution, branded Sulconazole 1% solution, Naftin 1% (naftifine) gel, naftifine 1% gel, Naftin 2% (naftifine) gel, Naftin 2% (naftifine) cream, naftifine 1% cream, naftifine 2% cream, Jublia 10% (efinaconazole) solution, Kerydin 5% (tavaborole) solution, tavaborole 5%

Background/Overview
The majority of the products mentioned in this policy are approved for the treatment of tinea infections (versicolor, pedis, corporis, and cruris). There are a variety of topical generic products (ketoconazole, clotrimazole, econazole) that are approved for use in these conditions that are equally as effective, yet substantially less expensive than the available brand name topical products. Jublia and Kerydin (and its generic equivalent) are approved for the treatment of onychomycoses. Other more cost effective and more clinically efficacious products for the treatment of onychomycoses include generic agents such as ciclopirox, terbinafine, or itraconazole. Xolegel and Extina are approved for seborrheic dermatitis, yet again there are other products that are available in generic form to treat this condition. There are also various products in this policy that have a generic equivalent. Generic equivalents are interchangeable with the branded reference product and offer a more cost-effective option versus the branded reference product.

Rationale/Source
This medical policy was developed through consideration of peer-reviewed medical literature generally recognized by the relevant medical community, U.S. Food and Drug Administration approval status, nationally accepted standards of medical practice and accepted standards of medical practice in this community, technology evaluation centers, reference to federal regulations, other plan medical policies, and accredited national guidelines.

The patient selection criteria presented in this policy takes into consideration clinical evidence or patient history that suggests the generically available alternatives listed in this policy will be ineffective or cause an adverse reaction to the patient. Based on a review of the available data and in the absence of any caveat mentioned, there is no advantage of using Mentax 1% (butenafine)

Current Effective Date: 10/10/2022

09/03/2020 Medical Policy Committee review
09/09/2020 Medical Policy Implementation Committee approval. Added products to the policy: naftifine 1% and naftifine 2% cream, Loprox 1% shampoo, Loprox 0.77% cream, Loprox 0.77% suspension, and oxiconazole 1% cream. Updated relevant portions of the policy to reflect the additions.
09/02/2021 Medical Policy Committee review
09/08/2021 Medical Policy Implementation Committee approval. Added the generic equivalent of Kerydin, tavaborole 5% solution, to the policy.
09/01/2022 Medical Policy Committee review
09/14/2022 Medical Policy Implementation Committee approval. Coverage eligibility unchanged.

Next Scheduled Review Date: 09/2023

**Medically Necessary (or “Medical Necessity”) - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:

A. In accordance with nationally accepted standards of medical practice;
B. Clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
C. Not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, “nationally accepted standards of medical practice” means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.
