Select Long-Acting Insulin Products

Policy # 00728

Original Effective Date: 02/08/2021

Current Effective Date: 11/11/2024

Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the "Company"), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.

When Services May Be Eligible for Coverage

Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- *Benefits are available in the member's contract/certificate, and*
- *Medical necessity criteria and guidelines are met.*

Based on review of available data, the Company may consider select insulin glargine products including, but not limited to branded insulin glargine-yfgn, branded insulin glargine, Semglee^{TM†} (insulin glargine-yfgn), Rezvoglar^{TM†} (insulin glargine-aglr) and branded insulin degludec to be **eligible for coverage**** when the below patient selection criterion is met.

Patient Selection Criteria

Coverage eligibility will be considered for select insulin glargine-products, including but not limited to branded insulin glargine-yfgn, branded insulin glargine, Semglee (insulin glargine-yfgn), Rezvoglar (insulin glargine-aglr), and branded insulin degludec when the following criterion is met:

- There is clinical evidence or patient history that suggests the use of Lantus^{®†} (insulin glargine), Levemir^{®†} (insulin detemir), Toujeo^{®†} (insulin glargine), or Tresiba^{®†} (insulin degludec) will be ineffective or cause an adverse reaction to the patient.

When Services Are Considered Not Medically Necessary

Based on review of available data, the Company considers the use of select insulin glargine products, including but not limited to branded insulin glargine-yfgn, branded insulin glargine, Semglee (insulin glargine-yfgn), Rezvoglar (insulin glargine-aglr), and branded insulin degludec when the patient selection criterion is not met to be **not medically necessary.****

Select Long-Acting Insulin Products

Policy # 00728

Original Effective Date: 02/08/2021

Current Effective Date: 11/11/2024

Background/Overview

The long acting products mentioned in this policy are approved for both Type 1 and Type 2 diabetes mellitus. Branded insulin glargine-yfgn, Semglee (insulin glargine-yfgn), Rezvoglar (insulin glargine-aglr), branded insulin glargine, and Lantus all contain 100 units per mL of insulin glargine. Levemir contains 100 units per mL of insulin detemir. Toujeo contains 300 units per mL of insulin glargine. Tresiba and branded insulin degludec contain either 100 or 200 units per mL of insulin degludec.

Rationale/Source

This medical policy was developed through consideration of peer-reviewed medical literature generally recognized by the relevant medical community, U.S. Food and Drug Administration approval status, nationally accepted standards of medical practice and accepted standards of medical practice in this community, technology evaluation centers, reference to federal regulations, other plan medical policies, and accredited national guidelines.

The patient selection criterion presented in this policy takes into consideration clinical evidence or patient history that suggests the use of Lantus, Levemir, Toujeo, or Tresiba will be ineffective or cause an adverse reaction to the patient. Based on a review of the data, in the absence of the above-mentioned caveat, there is no advantage of using branded insulin glargine-yfgn, branded insulin glargine, Semglee (insulin glargine-yfgn), Rezvoglar (insulin glargine-aglr), or branded insulin degludec over Lantus, Levemir, Toujeo, or Tresiba.

- 10/03/2024 Medical Policy Committee review
- 10/08/2024 Medical Policy Implementation Committee approval. Coverage eligibility unchanged.

Next Scheduled Review Date: 10/2025

****Medically Necessary (or “Medical Necessity”)** - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:

- A. In accordance with nationally accepted standards of medical practice;
- B. Clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
- C. Not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, “nationally accepted standards of medical practice” means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.

Policy # 00728

Original Effective Date: 02/08/2021

Current Effective Date: 11/11/2024

NOTICE: If the Patient's health insurance contract contains language that differs from the BCBSLA Medical Policy definition noted above, the definition in the health insurance contract will be relied upon for specific coverage determinations.

NOTICE: Medical Policies are scientific based opinions, provided solely for coverage and informational purposes. Medical Policies should not be construed to suggest that the Company recommends, advocates, requires, encourages, or discourages any particular treatment, procedure, or service, or any particular course of treatment, procedure, or service.

NOTICE: Federal and State law, as well as contract language, including definitions and specific contract provisions/exclusions, take precedence over Medical Policy and must be considered first in determining eligibility for coverage.
