Select buprenorphine/naloxone Combination Products

Policy # 00355
Original Effective Date: 06/25/2013
Current Effective Date: 04/18/2018

Applies to all products administered or underwritten by Blue Cross and Blue Shield of Louisiana and its subsidiary, HMO Louisiana, Inc. (collectively referred to as the “Company”), unless otherwise provided in the applicable contract. Medical technology is constantly evolving, and we reserve the right to review and update Medical Policy periodically.

When Services May Be Eligible for Coverage
Coverage for eligible medical treatments or procedures, drugs, devices or biological products may be provided only if:

- Benefits are available in the member’s contract/certificate, and
- Medical necessity criteria and guidelines are met.

Based on review of available data, the Company may consider the following buprenorphine/naloxone combination products: brand/generic Suboxone® tablets and Bunavail™ to be eligible for coverage when the below patient selection criterion is met:

Patient Selection Criterion
Coverage eligibility will be considered for brand/generic Suboxone tablets or Bunavail when the following criterion is met:

- The patient has opioid dependence

**Note that Suboxone Film and Zubsolv® are NOT subject to this medical policy**

When Services Are Considered Investigational
Coverage is not available for investigational medical treatments or procedures, drugs, devices or biological products.

Based on review of available data, the Company considers the use of brand/generic Suboxone tablets or Bunavail when patient selection criteria are not met to be investigational.*

Background/Overview
Buprenorphine/naloxone combination products are indicated for the treatment of opioid dependence.

Rationale/Source
Buprenorphine/naloxone combination products have the potential to be used off label for various indications, including pain management. The purpose of this policy is to limit the use of buprenorphine/naloxone combination products to those patients with opioid dependence. Patient selection criteria are based on information collected in a review of the available data.

Policy # 00355
Original Effective Date: 06/25/2013
Current Effective Date: 04/18/2018

Policy History
Original Effective Date: 06/25/2013
Current Effective Date: 04/18/2018
06/06/2013 Medical Policy Committee review
06/25/2013 Medical Policy Implementation Committee approval. New policy.
06/05/2014 Medical Policy Committee review
06/18/2014 Medical Policy Implementation Committee approval. Changed title from “buprenorphine/naloxone (Suboxone) Products” to “buprenorphine/naloxone Combination Products” due to a new product on the market. Added Zubsolv as an example of a drug that falls under generic buprenorphine/naloxone combination products.
04/02/2015 Medical Policy Committee review
04/20/2015 Medical Policy Implementation Committee approval. Added new product Bunavail to policy.
04/07/2016 Medical Policy Committee review
04/20/2016 Medical Policy Implementation Committee approval. No change to coverage.
04/06/2017 Medical Policy Committee review
04/19/2017 Medical Policy Implementation Committee approval. No change to coverage.
04/05/2018 Medical Policy Committee review
04/18/2018 Medical Policy Implementation Committee approval. Removed Suboxone Film and Zubsolv from the policy.

Next Scheduled Review Date: 04/2019

*Investigational – A medical treatment, procedure, drug, device, or biological product is Investigational if the effectiveness has not been clearly tested and it has not been incorporated into standard medical practice. Any determination we make that a medical treatment, procedure, drug, device, or biological product is Investigational will be based on a consideration of the following:
A. Whether the medical treatment, procedure, drug, device, or biological product can be lawfully marketed without approval of the U.S. Food and Drug Administration (FDA) and whether such approval has been granted at the time the medical treatment, procedure, drug, device, or biological product is sought to be furnished; or
B. Whether the medical treatment, procedure, drug, device, or biological product requires further studies or clinical trials to determine its maximum tolerated dose, toxicity, safety, effectiveness, or effectiveness as compared with the standard means of treatment or diagnosis, must improve health outcomes, according to the consensus of opinion among experts as shown by reliable evidence, including:
  1. Consultation with the Blue Cross and Blue Shield Association technology assessment program (TEC) or other nonaffiliated technology evaluation center(s);
  2. Credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community; or
  3. Reference to federal regulations.

**Medically Necessary (or “Medical Necessity”) - Health care services, treatment, procedures, equipment, drugs, devices, items or supplies that a Provider, exercising prudent clinical judgment, would provide to a patient for the purpose of preventing, evaluating, diagnosing or treating an illness, injury, disease or its symptoms, and that are:
A. In accordance with nationally accepted standards of medical practice;
B. Clinically appropriate, in terms of type, frequency, extent, level of care, site and duration, and considered effective for the patient's illness, injury or disease; and
C. Not primarily for the personal comfort or convenience of the patient, physician or other health care provider, and not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of that patient's illness, injury or disease.

For these purposes, "nationally accepted standards of medical practice" means standards that are based on credible scientific evidence published in peer-reviewed medical literature generally recognized by the relevant medical community, Physician Specialty Society recommendations and the views of Physicians practicing in relevant clinical areas and any other relevant factors.
