

Three-Tier Blue Selections Rx Member Guide

Louisiana

HMO Louisiana

2023

Your Guide to Your Prescription Drug Program

Blue Cross and Blue Shield of Louisiana and our subsidiary, HMO Louisiana, Inc., along with Express Scripts, an independent company that serves as our pharmacy benefit manager, created this *Blue Selections Rx Member Guide* to help you understand your drug benefits. Because drug benefits can be complex, understanding your benefits is key to getting the most from your health plan.

Throughout the year, our clinical staff works with our Pharmacy and Therapeutics Committee, a group of Louisiana doctors and pharmacists who are not employed by Blue Cross, to review published literature about the safety, efficacy and cost of prescription drugs.

You and your doctor always make the final decision for your health care needs. The information in this *Guide* can help you and your doctor make informed decisions before you fill your next prescription. That way, together you may choose the best drug for you while keeping your costs down. Please talk to your doctor or pharmacist about any questions or concerns you may have about your drug therapy.

Please Note: Just because a drug is on this list does not mean that your doctor or other authorized prescriber will prescribe it for a particular medical condition or mental illness.

This *Guide* is intended as a general reference for plans with a **3-tier, open formulary**. Because not all plans offer the same benefits, inclusion of a drug in this guide does not guarantee coverage under your plan. Check your member contract for coverage restrictions, exclusions or limitations that may apply to you.

How can you find information about your drugs?

Use the index at the end of this *Guide* to look up a drug you may take to quickly learn several important things:

- If you must first try one or more prescription drugs before your plan will cover a specific drug for your condition
- If your doctor must get prior authorization before your plan will pay for a drug
- If your plan limits the quantity that will be covered each time you fill a prescription

Important Notes:

- This *Guide* includes most drugs that your plan covers as of the date it was created. The *Guide* may change as changes occur in the marketplace.
- The *Guide* may not apply to all benefit plans. Some benefit plans may have different coverage for specific drugs.
- The *Guide* applies only to prescription drugs that participating pharmacies dispense on an outpatient basis.
- Read your member contract or certificate for pharmacy coverage for any exclusions or limitations that apply.

How are prescription drugs classified?

Your plan offers a 3-tier structure for drugs that are covered:

Tier	Description of prescription drugs
1	Primarily generic drugs, although some brand drugs may fall into this category.
2	Brand drugs.
3	Brand or generic drugs that may have a therapeutic alternative as a Tier-1 or Tier-2 drug. Covered compounded drugs and multi-source brand drugs are included in this tier.

You will pay the least out of pocket for *generic drugs* or drugs that are in Tier 1. You will pay the most out of pocket for drugs in Tier 3. Note that if any brand drug loses patent protection after the publishing of this *Guide* and a generic equivalent becomes available, you must pay the Tier 3 copayment for the brand drug.

What does it mean when the Tier section shows * or ** next to the number?

Certain drugs may be eligible for first-dollar coverage. That means you do not pay out of pocket for them and you do not pay a deductible. Drugs in these programs are marked with an * or ** next to the number in the tier column. Because some benefit plans do not have this type of coverage, you should read your plan materials to find out if you have it. If you do not have this type of coverage, you may be responsible for some or all of the cost of the drug. Note that restrictions or limitations may apply, including age, gender or frequency.

Broad categories of drugs that may be eligible for this coverage include:

- X*:** Select contraceptives for women
- X*:** Select preventive drugs as recommended by the U.S. Preventive Services Task Force (USPSTF): For example, select bowel prep products when used with a wellness screening colonoscopy.

Example of How Drugs Are Listed:

Drug	Tier	Requirements/Limits
<i>generic drug name</i>	1	QPD
BRAND DRUG NAME	2	PA; ST
Key: <ul style="list-style-type: none"> • <i>generic drugs</i> are in lowercase <i>italics</i> • BRAND drugs are in ALL CAPS 		Key: <ul style="list-style-type: none"> PA = Prior authorization QPD = Quantity per dispensing limits ST = Step therapy restrictions SP = Specialty drug restrictions

What do the abbreviations in the Requirements/Limits column mean?

PA: Medications requiring prior authorization

We must authorize certain drugs before your plan will pay for them. After considering current medical literature, the Pharmacy and Therapeutics Committee sets up the criteria needed for the drugs to be authorized. Then Express Scripts processes the prior authorization requests.

If you need prior authorization, have your doctor contact Express Scripts:

Call: 1-800-842-2015

Fax: 1-877-837-5922

For the physician fax form, go to www.bcbsla.com/Providers/PharmacyManagement.

QPD: Medications that have quantity per dispensing limitations

Covered prescriptions have a day-supply limitation (typically up to a 30-day supply at a retail pharmacy and up to a 90-day supply for mail-order). Your plan also limits the amount of certain drugs that can be dispensed at one time. We call those restrictions quantity per dispensing (QPD) limits.

QPD limits are additional to the day-supply limitation and are based on the manufacturer’s recommended dosage and duration of therapy, common usage for episodic or intermittent treatment, FDA-approved recommendations or clinical studies, and as determined by Blue Cross. QPD limits or allowances are subject to quantity limits per day supply, per dispensing event, or any combination of the two. Read your member contract or certificate for the limits for your plan. For a complete list of **Quantity per Dispensing (QPD) Level Limits/Allowances**, go to www.bcbsla.com/CoveredDrugs.

SP: Specialty drug restrictions

Certain drugs are commonly called *specialty drugs*. Specialty drugs include biotechnology drugs or other drug products that may require special ordering, handling or customer service. Your policy may require you to buy these drugs at a network specialty pharmacy to receive in-network benefits. Your policy may limit specialty drugs to the retail day supply listed in your plan (typically a 30-day supply). Read your *Schedule of Benefits* for any restrictions that apply to you. For a complete list of specialty drugs, go to www.bcbsla.com/CoveredDrugs. For information about our contracted specialty pharmacies, call Express Scripts at 1-866-781-7533.

ST: Medications requiring participation in the Fill This First step therapy program

For drugs in our Fill This First step therapy program, you must first try certain prescription drugs (Step 1) before your plan will cover other drugs (Step 2) for your condition. If one or more of the Step 1 drugs are not right for you, your doctor may call us for a prior authorization for a Step 2 drug. You can find more information about drugs that you must try first at www.bcbsla.com/CoveredDrugs.

Questions?

If your doctor prescribes a drug that is not in this *Guide*, or if you have any questions, call Express Scripts at 1-866-781-7533.

For more information and updates, go to www.bcbsla.com/CoveredDrugs or www.express-scripts.com.
