

Common Drugs Not Covered and Their Covered Alternatives

About this list: This is a list of the most common single-source brand (drugs that do not have a generic equivalent or exact copy) and generic drugs that will not be covered. Multi-source brand name drugs (drugs that have a generic equivalent or exact copy) are not included on this list, but most will not be covered as well.

If your drug is on this list: This means it won't be covered. Talk to your doctor about switching to a covered drug to treat your health problems. Your doctor may also ask for a drug to be covered if you have a medically necessary need for it. We will review your doctor's request, but coverage may not be possible for all drugs. If you want to take a drug that is not covered, you may have to pay its full cost.

Key: BRAND medications are listed in UPPERCASE and generics in lowercase. *These drugs may be covered in other strengths and/or dosage forms.
